

# REGION FOUR MATERIALS & ASSET MANAGEMENT DIVISION

## Materials and Asset Management Division:

The Materials and Asset Management Division is lead by the Region Materials Engineer. They are responsible for materials selection and approval, asset management, independent assurance, quality assurance, pavement design materials certification and training.

The Asset Management Division analyzes all the regions roadway features and recommends treatment and preservation strategies. They coordinate the collection and evaluation the regions roadway distress data. They coordinate with UDOT's Central Asset Management Division to align modeling and cost/benefit choices with the Region's needs to perform roadway preservation. They are responsible to evaluate pavement condition and design pavement alternatives for every project in the Region.
